Urdu: Tradition is the basis of Tafseer. The Holy Quran is the pinnacle of Shariat. Prophets are the link between the past and the present. The Messenger of God, Muhammad, is the guide to the world. The most important matters are: to understand God and His message and their connection with human beings; to resolve conflicts in accordance to God's order and to obey God. Translation to Urdu "A person who truly understands the Holy Quran, Prophets and Hazarats (companions) will believe in the message of the Qur'an. The Holy Quran is for the Muslims, and the Holy Quran is for the non-Muslims too." Urdu language on the other hand lacks one of the many elements of Standard English: Urdu is a language which only consists of 25% of the English language, this is due to Urdu being a language brought from India with a huge population of Muslims (one of every three people are Muslim), and their culture a few hundred years earlier, compared to the time of Standard English. Urdu as stated previously is spoken in South Asia and Afghanistan. Urdu is the official language of Afghanistan, India, Pakistan, and Bangladesh. Although it is spoken in northern India and in Pakistan, it is mostly considered a regional language. There are 5.1 million native speakers in Pakistan. In India, according to the 2001 census, there were 50 million native speakers. The linguistic origins of Urdu are uncertain. The earliest forms of Urdu have been linked to the Persian language. Persian was the language of the Persian Empire and the administrative language of the Abbasid Caliphate, and later the language of the Ottoman Empire. The majority of people speaking Persian when the Muslim conquests began spoke that language either under the Abbasid Caliphate or under the various successor-states of the Abbasid Caliphate. When the Islamic Golden Age began with the Abbasid Caliphate, the cities of Fars, Kerman, Shiraz, and Isfahan flourished as a result of the renaissance in philosophy and the arts. At the time of

I wrote an app and it works fine when I run it on my Galaxy S3 running 4.2.2. But when I use the emulator (Galaxy S2 API 13), it crashes. I ran the app under the debugger and I figured out that the line commented out in the code below is causing the crash. I don't understand why this is the case. Can anyone help? A: It's probably not possible to get this to work from within the emulator. If you are running from the Android SDK, there is a market client there (see Tools->Android SDK->Android SDK Tools) that can be used to view app details on your device if you have a Google account connected. You can also download the APK from the device using adb, using the following command: adb install -r MyAppName.apk The invention relates to a two-component system intended to be f678ea9f9e
